

JUP Airdrop Eligibility Checker - GUI Version

This offline tool simulates checking a Solana wallet's eligibility for the JUP airdrop.

REQUIREMENTS:

- Python 3.9 or newer
- tkinter (standard in Python for Windows)

USAGE:

1. Open terminal or command prompt
2. Navigate to the tool's folder
3. Run:

```
pip install -r requirements.txt
```

```
python jup_checker_gui.py
```

Then enter a wallet address and click "Check Airdrop".

The result will appear, and you can export it to a .txt file.

This app runs completely offline.
